

Assignment 1

1. Write a program to print “Your Full name” using echo

Screenshot:

```
<!DOCTYPE html>
<html>
<body>
```

```
<?php
echo "Anant Manish Singh";
?>
```

```
</body>
</html>
```

Anant Manish Singh

2. Write a program to print “first name middle name last name” using variable

Input Code:

```
<?php
```

```
$fname = "Anant";
```

```
$mname = "Manish";
```

```
$lname = "Singh";
```

```
$myname = $fname . " " . $mname . " " . $lname;
```

```
echo $myname;
```

```
?>
```

Output:

Anant Manish Singh

3. Write a program to print two variables in single echo

Input Code:

```
<?php
$var1 = "TCET";
$var2 = "PMKVY";

echo $var1 . "-" . $var2;
?>
```

Output:

```
TCET-PMKVY
```

4. Write a program to perform addition of two numbers

Input Code:

```
<?php
$num1 = 56;
$num2 = 4;

$sum = $num1 + $num2;

echo "The sum of $num1 and $num2 is: " . $sum;
?>
```

Output:

```
The sum of 56 and 4 is: 60
```

5. Write a program to perform subtraction of two numbers

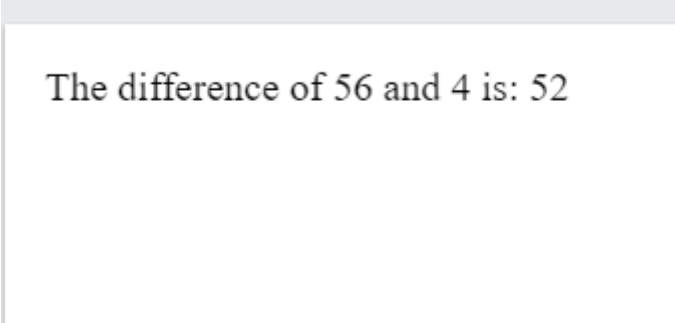

Input Code:

```
<?php
$num1 = 56;
$num2 = 4;

$diff = $num1 - $num2;

echo "The difference of $num1 and $num2 is: " . $diff
?>
```

Output:

The difference of 56 and 4 is: 52

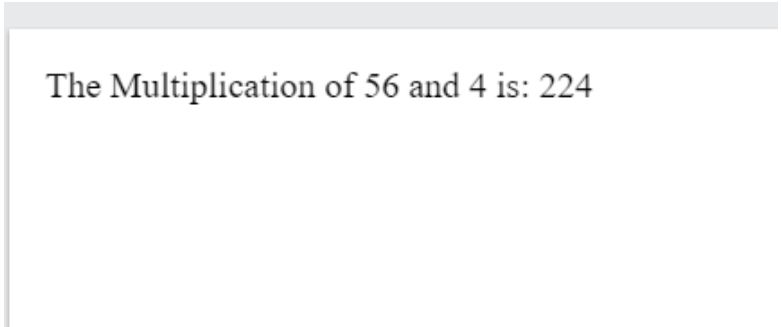

6. Write a program to perform multiplication of two numbers

Input Code:

```
<?php
$num1 = 56;
$num2 = 4;

$mul = $num1 * $num2;
echo "The Multiplication of $num1 and $num2 is: " . $mul
?>
```

Output:

The Multiplication of 56 and 4 is: 224

7. Write a program to perform division of two numbers

Input Code:

```
<?php
    $num1 = 56;
    $num2 = 4;

    $div = $num1 / $num2;
    echo "The Division of $num1 and $num2 is: " . $div
?>
```

Output:

The Division of 56 and 4 is: 14
